PHOTOGRAPHIC SCIENCE AND ENGINEERING
Volume 12, Number 6, November–December 1968

Photographic Science and Engineering

VOLUME 12–1968; NUMBERS 1–6

TITLE INDEX

Acknowledgment
LOUIS ROSENBLUM AND R. CLARK JONES No. 1, p. 1
Analogous Considerations of Spectral Sensitization of Different Photographic Systems
H. FRIESER AND M. SCHESINGER No. 1, p. 17
Automatic Technique for Abstracting Color Descriptions from Aerial Photography
J. GOURLEY, H. T. RIB, AND R. D. MILES No. 1, p. 27
Autoxidation of Phenidone
W. E. LEE AND EVA ZAHORIAN No. 5, p. 251
Background—Light Sensitization of a Fast Emulsion
A. GUTTMAN No. 3, p. 146
Book Reviews
Chemistry of Photographic Mechanisms, rev. by T. H. JAMES No. 6, p. 313
Farbphotographic (Color Photography) Theory and Practice, rev. by DR. G. KLINGER and DR. F. VIRO No 3, p. 175
Kurzzeitphotographie, Bericht ber den VII Internationalen Kongress für Kurzzeitphotographie und Hochfrequenzkinematographie, Zürich, 1965, rev. by T. H. JAMES No. 1, p. 61
Manual of Oscillography, rev. by H. J. SCHWALENSTOCKER No. 6, p. 313
Photographic Science Symposium: Paris 1965, rev. by E. F. HAUGH No. 3, p. 175
Photography for the Scientist, rev. by HOLLIS N. TODD No. 5, p. 267
Photosensitive Diazo Compounds, rev. by PETER WALKER No. 5, p. 268
Thin Films in Optics, rev. by FRANC GRUM No. 2, p. 119
View Camera Technique by Leslie Stroebel, rev. by Thomas T. Hill No. 2, p. 119
Change of Editor
RUSSELL H. GRAY No. 1, p. 1
CIE Color Rendering Index
C. W. JEROME No. 1, p. 57
Conventional and Dissolution Latent Images in Photosoluble Silver Halide Systems
EUGENE F. HAUGH AND JACK F. STRANGE No. 4, p. 222
Corona Charging Behavior of Xerographic Layers
M. SMITH AND A. J. BEHRINGER No. 3, p. 165
Critical Potential for Development
R. B. PONTIUS, CAROL R. VANDERVOORN AND R. M. COLE No. 2, p. 102
Developer Activity of *p*-Benzoquinone Solutions
T. H. JAMES No. 2, p. 67
Effect of Quaternary Salts in *p*-Phenylenediamine Developers
D. NEUBERGER AND H. C. ROBERTS No. 3, p. 121
Effects of Aggregation, Temperature, and Supersensitization on the Luminescence of 1,1′-Diethyl-2,2′-Cyanine Chloride Adsorbed to Silver Chloride
P. B. GILMAN, JR. No. 5, p. 230
Effects of Noise on the Determination of Photographic System Modulation Transfer Functions
E. S. BLACKMAN No. 5, p. 244
Electrostatic Trigger Used for Daylight Lightning Photography
R. G. HAWE No. 4, p. 219
From the Editor
D. R. WHITE No. 2, p. 65; No. 5, p. 229
Half Century of Photographic Standardization in the United States
C. S. McCAMY No. 6, p. 307
Heteropolyacids for High Level Dosimetry
GORDON N. FLANNAGAN No. 2, p. 117
Implications of a Quantum Model of the Latent Image
F. TRAUTWEILER No. 3, p. 138
Influence of Solvation on the Growth of AgBr Crystals
F. H. CLAES AND W. PEELAERS No. 4, p. 207
In Memoriam: Herman Hans Duerr, 1901–1967
F. W. H. MUELLER No. 2, p. 66
In Memoriam: Chester F. Carlson, 1906–1968 No. 6, p. 273
Interference with the Abribat Test for Labile Sulfur in Gelatin and Some Implications with Respect to Chemical Sensitization Rates
GEORGE H. NAWN No. 2, p. 108
Kinetics and Mechanism of the Reaction of Thiosulfate with Bisulfite in Aqueous Solution
C. J. BATTAGLIA AND W. J. MILLER No. 1, p. 46
Latent-Image Formation as a Probabilistic Process
J. F. HAMILTON No. 3, p. 143
Mathematical Model of Photometric Oxygen Consumption in Photopolymer
D. K. SMITH No. 5, p. 263
Modified Electron Transfer Mechanism for Spectral Sensitization in Photography
TADAAKI TANI, SHIN-ICHI KIKUCHI, AND KEN-ICHI HONDA No. 2, p. 80
New Method of Thermoplastic Image Recording Based on Orientation of Colloidal Particles
B. KAZAN, D. P. FOOTE, AND D. G. MARLOW No. 6, p. 273
New Methods for Photoresist Exposure Determination
M. S. HTOO No. 3, p. 169
PACA-70 Camera, a Development for a Unique Approach to Panoramic Photography
JAN GRIFFIOEN AND VINCENT W. BALL No. 1, p. 53
Parameters Determining the Mechanism of Latent-Image Formation
R. MATEJEC AND E. MOISAR No. 3, p. 133
Persistent Photoconductivity—Charge Transfer
ALFRED H. SPORER No. 4, p. 213
Photographic Development by Metal Ions—An Investigation of the Mechanism of Chromous Ion Development
HARRY J. PRICE No. 6, p. 287

Photo-Physicochemical Behavior of Iron and Chromium Compounds
SHIN SUZUKI, KAZUO MATSUMOTO, KIEKO HARADA, AND EIKO TSUBURA No. 1, p. 2
Photopolymer Image Transfer Rheology
I. J. BERKOWER, J. BEUTEL, AND P. WALKER No. 6, p. 282
Photopolymerization Studies: II. Imaging and Optical Fixing
J. DAVID MARGERUM, LEROY J. MILLER, AND JOHN B. RUST No. 4, p. 177
Physical Parameters of a Thermoplastic Polymer Film in an Electron Beam Read/Write System
L. S. CHANG No. 5, p. 238
Resolved Spectra of Small Cyanine Dye Aggregates and a Mechanism of Supersensitization
A. E. ROSENOFF, K. S. NORLAND, A. E. AMES, V. K. WALWORTH, AND G. R. BIRD No. 4, p. 185
Search for a Summary Measure of Image Quality—A Progress Report
FRANK SCOTT No. 3, p. 154
Short Communication: The Illumination of the Emulsion for Photographic Granularity Measurements
W. KRAUS No. 4, p. 217
Space-Charge Layer and Surface Sensitivity in AgBr Single Crystals
V. I. SAUNDERS, R. W. TYLER, AND W. WEST No. 2, p. 90
Spectra and Structure of Sensitizing Dye Aggregates
GEORGE R. BIRD, KENNETH S. NORLAND, ALAN E. ROSENOFF, AND HAZEL BRYANT MICHAUD No. 4, p. 196
Superadditivity with Hydroquinone of Photographic Developing Agents Forming Stable Semiquinones
G. F. VAN VEELEN AND J. F. WILLEMS No. 1, p. 41
Surface Space Charge in Silver Bromide Crystals and Its Bearing on the Photographic Process
F. TRAUTWEILER No. 2, p. 98
Survey of Film Flatness in No. 126 Cartridges
PERRY W. BRANCH, EARL R. CLARK, AND MILTON R. GOFF No. 6, p. 301
Two Methods for Measuring Photographic Film Flatness
EARL R. CLARK AND MILTON R. GOFF No. 6, p. 295
Visual Comparison of Photographic Transparencies and Photomechanical Reflection Prints
C. J. BARTLESON No. 1, p. 36

AUTHOR INDEX

AMES, A. E., See Rosenoff, A. E.
BALL, VINCENT W., see Griffioen, Jan
BARTLESON, C. J.
Visual Comparison of Photographic Transparencies and Photomechanical Reflection Prints No. 1, p. 36
BATTAGLIA, C. J.
The Kinetics and Mechanism of the Reaction of Thiosulfate with Bisulfite in Aqueous Solution No. 1, p. 46
BEHRINGER, A. J , see Smith M.
BERKOWER, I. J.
Photopolymer Image Transfer Rheology No. 6, p. 282
BEUTEL, J., see Berkower, I. J.
BIRD, GEORGE R.
Spectra and Structure of Sensitizing Dye Aggregates No. 4, p. 196
——, see Rosenoff, A. E.
BLACKMAN, E. S.
Effects of Noise on the Determination of Photographic System Modulation Transfer Functions No. 5, p. 244
BRANCH, PERRY W.
A Survey of Film Flatness in No. 126 Cartridges No. 6, p. 301
CHANG, L. S.
The Physical Parameters of a Thermoplastic Polymer Film in an Electron Beam Read/Write System No. 5, p. 238
CLAES, F. H.
Influence of Solvation on the Growth of AgBr Crystals No. 4, p. 207
CLARK, EARL R.
Two Methods for Measuring Photographic Film Flatness No. 6, p. 295
——, see Branch, Perry W.
COLE, R. M., see Pontius, R. B.
FLANNAGAN, GORDON N.
Heteropolyacids for High Level Dosimetry No. 2, p. 117
FOOTE, D. P., see Kazan, B.
FRIESER, H.
Analogous Considerations of Spectral Sensitization of Different Photographic Systems No. 1, p. 17
GILMAN, P. B.
Effect of Aggregation, Temperature, and Supersensitization on the Luminescence of 1,1'Diethyl-2,2'-Cyanine Chloride Adsorbed to Silver Chloride No. 5, p. 230
GOFF, MILTON R., see Branch, Perry W.
——, see Clark, Earl R.
GOURLEY, J.
Automatic Technique for Abstracting Color Descriptions from Aerial Photography No. 1, p. 27
GRAY, RUSSELL H.
Change of Editor No. 1, p. 1
GRIFFIOEN, JAN
The PACA-70 Camera, a Development for a Unique Approach to Panoramic Photography No. 1, p. 53
GUTTMAN, A.
Background—Light Sensitization of a Fast Emulsion No. 3, p. 146
HAMILTON, J. F.
Latent-Image Formation as a Probabilistic Process No. 3, p. 143
HARADA, KIEKO, see Suzuki, Shin
HAUGH, EUGENE F.
Conventional and Dissolution Latent Images in Photosoluble Silver Halide Systems No. 4, p. 222
HAWE, R. G.
Electrostatic Trigger Used for Daylight Lightning Photography No. 4, p. 219
HONDA, KEN-ICHI, see Tani, Tadaaki
HTOO, M. S.
New Method for Photoresist Exposure Determination No. 3, p. 169
JAMES, T. H.
The Developer Activity of *p*-Benzoquinone Solutions No. 2, p. 67
JEROME, C. W.
The CIE Color Rendering Index No. 1, p. 57
JONES, R. CLARK, see Rosenblum, Louis
KAZAN, B.
An New Method of Thermoplastic Image Recording Based on Orientation of Colloidal Particles No. 6, p. 273
KIKUCHI, SHIN-ICHI, see Tani, Tadaaki
KRAUS, W.
Short Communication: The Illumination of the Emulsion for Photographic Granularity Measurements No. 4, p. 217
LEE, W. E.
The Autoxidation of Phenidone No. 5, p. 251
MARGERUM, J. DAVID
Photopolymerization Studies: II. Imaging and Optical Fixing No. 4, p. 177
MARLOW, D. G., see Kazan, B.
MOISAR, E., see Matejec, R.
MATEJEC, R.
On the Parameters Determining the Mechanism of Latent-Image Formation No. 3, p. 133
MATSUMOTO, KAZUO, see Suzuki, Shin
MCCAMY, C. S.
A Half Century of Photographic Standardization in the United States No. 6, p. 307
MICHAUD, HAZEL BRYANT, see Bird, George R.
